

Goal (g): Find the cheapest Sephora brush.

Elementwise Score Calculation

Unary Importance $\Phi(t)$

0	1	2	3	4	5	...

$$\Phi(t) = \text{BERTScore}(g, s_t)$$

Pairwise Diversity $D(i, j)$

	0	1	2	3	4	5	...
0							
1							
2							
3							
4							
5							
...							

$$D(i, j) = \max(\delta(s_i, s_j), \delta(y_i, y_j))$$

Greedy Subset (J) Selection

	0	1	2	3	4	5	...
0							
1							
2							
3							
4							
5							
...							

$$J_2 = \{2, 5\}$$

Step 1: Select the best pair

Step 2: Iteratively expand J by maximizing the marginal gain
